It can be readily understood that the profit on each suit must of necessity be small, but we estimate that, from increase of business, a preater profit will ultimately accrue to us than if we charged a higher price.

transit to the Peak. This it is the intention of the Company to provide by placing the Gap within seven minutes ride from the City level. The general merits of the project have

been made known by the local newspapers, and it will therefore be sufficient to state that the Company has taken over a wellmatured scheme which has received, during unwards of four years, careful consideration from its Promoters, with the assistance of the best professional advice. One of the Promoters, it may be mentioned, has recently inspected most of the existing mountain tramways in Europe and America. The construction of the Tramway is now being proceeded with under the superintendence and management of Mr J. F.

Boulton, Assoc. M. Inst. C.E., and Mr. JANES ANDERSON, on a principle embracing All Claims against the Steamer must be all the most recent improvements and ensuringlabsolute safety in working. In addition to the income from passenger traffic already assured by the great number

of residences now existing at the Peak, a considerable revenue is confidently expected from the facilities of access to the mountain offered to visitors and residents. The Company also anticipates an additional income from the overhill traffic to Aberdeen and Pokfulum, and the Carriage of Building Materials, Coal, and General Goods and Parcels.

It is in contemplation to have wellappointed Chairs under the Company's control at the Gap to convey passengers from thence to any point on the mountain, at fixed rates, and also, if necessary, Chairs and 'Rickshaws at the lower terminus. As we have already remarked, it is rather a strange coincidence that members of the escorts attached to the British Legations at Peking and Tokio should have died from the same cause within a few days of each other.
